### **DETAILED ACTION**

1. Claims 5-14 are pending in this application.

#### ***Claim Objections***

2. Claim 8 is objected to because of the following informalities: claim 8, line 1, after "apparatus" inserts "according to claim 5" and line 4, after "communication terminal" deletes "apparatus according to claim 5". Appropriate correction is required.

#### ***Drawings***

3. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims.

Therefore, the "a first correlation system", "a detecting system", "a second correlation system", "an acquiring system", "a third correlation system", "an identification system" of claim 11 and 12; must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate

Art Unit: 2664

changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

***Claim Rejections - 35 USC § 112***

4. Claims 11-14 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The specification does not teach the features as in claims 11-14.

***Allowable Subject Matter***

5. Claims 5-10 are allowed over prior art.

6. The following is a statement of reasons for the indication of allowable subject matter: the prior made of record does not teach in combination a radio communication terminal apparatus comprising a slot timing specifying system; a correlation system, a

pattern specifying system, a frame timing specifying system and a long code group specifying system, such as that recited in claims 5-10.

**Conclusion**

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Shou et al (US 6,038,250) discloses initial synchronization method and receiver for DS-CDMA inter base station asynchronous cellular system.

Shou et al (US 5,910,948) discloses acquisition scheme and receiver for an asynchronous DS-CDMA cellular communication system.
